Art Unit: 1761

Claim 16 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 16 is vague and indefinite. Claim 16 recites that the food product is baked; however, claim 13 from which it is depended from recites that the cooking the food product by contacting it with oil or fat. Thus, it is not clear how claim 16 further limits claim 13 when it is contradicting claim 13.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Marsland ( US2003/0091698).

Marsland discloses a dough composition which is used to prepare foods such as doughnuts, chips, fries etc.. The foods can be cooked by frying, baking etc... The composition comprises wheat protein isolate in the amount of 5-50%. ( see paragraphs 0006, 0007, 0012, 0018).

Marsland discloses a food composition comprising wheat protein isolate in the amount claimed; thus, it is inherent the food has the property of " reduced fat content" as claimed. With respect to claim 13, Marsland teaches the steps of adding wheat

protein isolate to the food product. Marsland teaches frying which means the food product is cooked by contacting it with oil or fat. Marsland also discloses baking. Marsland also teaches combination of cooking which means the food can be cooked by contacting with oil and that the food is baked which meets the limitation of claim 16.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Murphy et al disclose a process for preparing baked goods containing protein.

Greene et al disclose the preparation of fried noodles wherein the amount of oil absorption is reduced by adding wheat gluten.

Takahashi et al disclose oil absorption retarder.
